

## Product Information

Oriboners Beam (CO2 laser beam combiner) is a high-quality optical component used in laser systems. It is designed to combine multiple laser beams into a single output beam. The combiner is made of high-purity ZnSe substrate and is coated with a dielectric film to provide high reflectivity and low loss. It is available in various sizes and configurations to meet different application requirements.

Carmanhaas [optical components](#) provides a wide range of [expander](#) products for your laser system. These expanders are designed to expand the laser beam to a larger diameter, which is useful for many industrial and scientific applications. For more information, please contact our sales team.
