### Aluminum Alloy Hydrazine Bottle Adapter

---

The product is thin in wall thickness with lattice structure inside, and the overall size is too large to be made by traditional manufacturing. However, precise laser forming technology can be integrated into one piece, with short manufacturing cycle and controllable deformation.

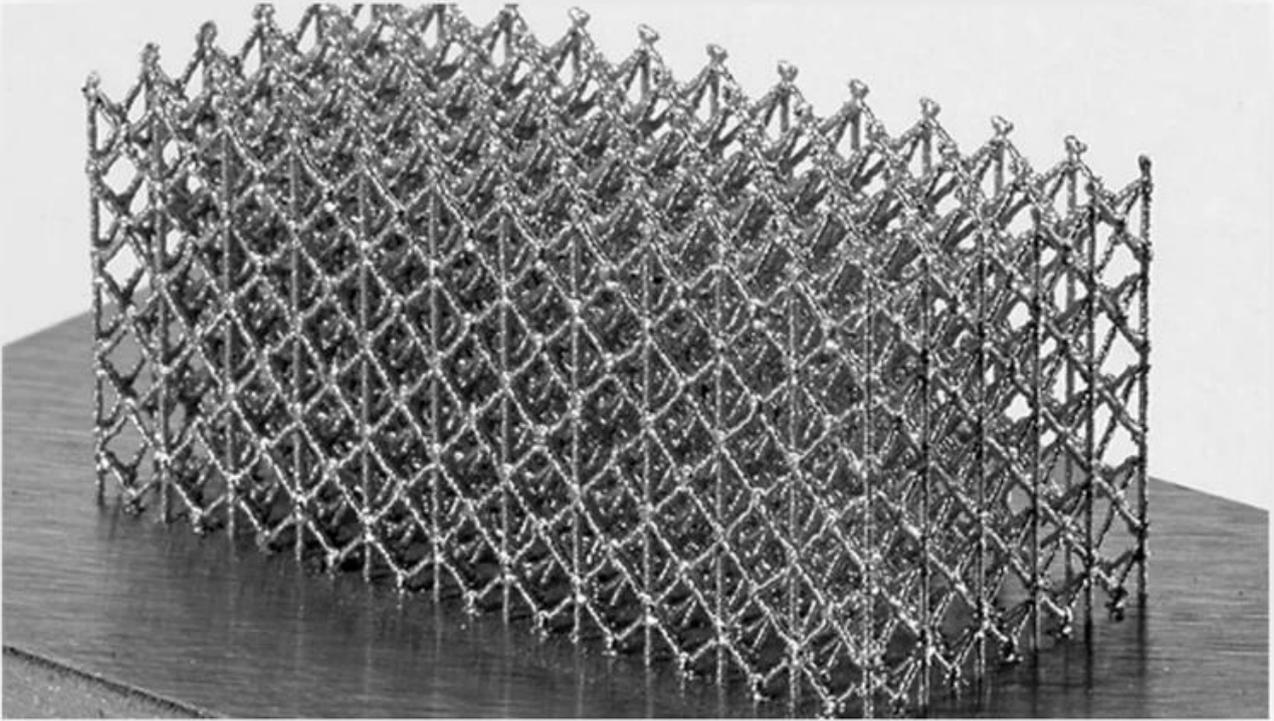

### Breathable Steel Mold

---

The product is printed in one piece, with high precision of special-shaped structure and smooth surface roughness, which reduces the post procedures. Due to the light-weight process, the waste of material is significantly reduced compare to the traditional manufacturing.
