

Product Information

Product Description:

Fiber Laser Welding is a welding technology used to create a strong joint between several metal components with fiber laser. Fiber laser produces a beam of high-intensity that is concentrated into one spot. This concentrated heat source enables fine, deep welding with high welding speed.

[China handheld welding manufacturer](#), Hand-held laser head is light and portable, it can weld any part of the workpiece, and has various welding methods such as butt welding, stack welding, tailored welding.

Fiber laser welding machine is widely used in IT industry, medical equipment, communications equipment, aerospace, machinery manufacturing, battery manufacturing, elevator manufacturing, craft gifts, household appliances manufacturing, tooling, gears, automobile shipbuilding, and other industries.
