

Product Description

Laser welding is a high efficient precision welding method which is in the use of high energy density laser beam as a heat source. Laser welding is one of the important aspects of laser processing technology. Laser radiates and heats the work piece surface, The surface heat diffuses to the inside through heat conduction, Then the laser makes the work piece melting and form the specific welding pool by controlling the laser pulse width, energy, peak power and repetition frequency. Due to its unique advantages, it has been successfully applied to the precise welding for micro parts and small parts. ([China welding machine 1000W handheld fiber laser factory](#))

Laser welding is fusing welding technology, laser welder puts laser beam as the energy source, and make it impact on the weld element joints to realize welding .

WELDING METHOD

Vertical Welding

Parallel Welding

Stitch Welding

Machine Features:

- 1.The energy density is high, the heat input is low, the amount of thermal deformation is small, and the melting zone and the heat-affected zone are narrow and deep.
- 2.High cooling rate, which can weld fine weld structure and good joint performance.
- 3.Compared with contact welding, laser welding eliminates the need for electrodes, reducing daily maintenance costs and greatly increasing work efficiency.
- 4.The weld seam is thin, the penetration depth is large, the taper is small, the precision is high, the appearance is smooth, flat and beautiful.
- 5.No consumables, small size, flexible processing, low operating and maintenance costs.
- 6.The laser is transmitted through fiber optics and can be used in conjunction with a pipeline or robot.

Machine Advantage:

1☐High efficiency

Speed is faster than the traditional welding speed by more than two times.

2☐High quality

Smooth and beautiful welding seam,without subsequent grinding, saving time and cost.

3☐Low cost

80% to 90% power savings, processing costs are reduced by 30%

4☐Flexible operation

Easy operation,no need experience can do a good job.

Solderless

360 degree no dead seam weld

No deformation

Perfect weld
