

Product Information

Product Description:

Wholesales Fixed Magnification Beam Expanders Laser beam expanders are used in applications such as laser scanning, interferometry or telemetry. The beam expander and collimation magnification are not only related to the parameters of the beam expander, but also to the parameters of the laser beam and the position of the beam expander lens.

CARMANHAAS The function of the beam expander is to reduce the divergence angle of the laser beam, thereby making the laser focus smaller. ([Variable Zoom Laser Beam Expanders supplier](#))
